

SUSHANT DEVKOTA

Network Engineer | IT Infrastructure & Systems Support

Lalitpur-14 Nakhipot, Nepal | devkota.sushant31@gmail.com | +977 984-3818474 | sushantd.com.np | linkedin.com/in/sushant-devkota-a829b7229

PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience administering firewalls, switches, wireless access points, and Active Directory in a live municipal network environment, alongside a year of public-sector IT support and e-governance operations. Comfortable troubleshooting connectivity issues end-to-end and keeping infrastructure secure and available. Supplements this with hands-on cloud and automation training (AWS, Docker, Kubernetes, Terraform), bringing an automation-minded approach to network operations. Looking to bring this combination of hands-on network administration and infrastructure discipline to a Network Engineer or Network Support role.

PROFESSIONAL EXPERIENCE

Information Technology & Administrative Assistant | Kathmandu Metropolitan City — Ward 22 Office Dec 2025 – Present

- Provide on-site IT support for Windows 11 environments: troubleshooting, network maintenance, peripheral setup, driver management, and Active Directory (AD) user account administration, keeping office systems running with minimal downtime.
- Operate core e-governance platforms, including the municipal Sifarish System, to process public service requests, verify documentation, and manage digital workflows for ward residents.
- Act as a front-line resource for staff and citizens navigating digital government services, translating technical issues into fast, practical fixes.

IT Assistant (Intern) — Network Focus | Kathmandu Metropolitan City (KMC) Oct 2025 – Dec 2025 (3 months)

- Managed firewall configurations and access policies as part of day-to-day network security operations.
- Configured and maintained network switches to support stable connectivity across municipal departments.
- Set up and maintained wireless access points, keeping Wi-Fi coverage reliable across office locations.
- Diagnosed and resolved network connectivity issues, escalating and documenting recurring faults to reduce repeat downtime.
- Administered Active Directory user accounts and access permissions to support secure, well-organized network operations.
- Supported broader IT infrastructure maintenance, network monitoring, and database upkeep, plus functional software testing ahead of departmental rollouts.

TECHNICAL SKILLS

Networking & Infrastructure: Firewall Management, Switch Configuration, Wireless Network Setup (Wi-Fi 6/7), Active Directory Administration, Network Troubleshooting, Network Monitoring

Systems Administration: Windows 11 Administration, Linux Administration, PC/Hardware Troubleshooting, Prometheus, Grafana, Software Testing

Cloud & Automation (supporting): AWS (EC2, S3, IAM), Docker, Kubernetes, Terraform, Ansible, Jenkins, Git, CI/CD

Programming & Frameworks: Python, Java, C++, C#, HTML/CSS, Django, MySQL, PostgreSQL

Public Sector Systems: Municipal Sifarish System, E-Governance Digital Workflows

CERTIFICATIONS & TRAINING

DevOps Training | Broadway Infosys

May 2025 – Jul 2025

- Hands-on training across the CI/CD toolchain: Docker, Kubernetes, Terraform, Ansible, Jenkins, AWS, Prometheus, and Grafana — automation background that transfers well to modern, infrastructure-as-code-driven network environments.

OTHER PROJECTS

- Cloud & CI/CD Infrastructure Deployment — automated build-and-deploy pipeline using Docker, Jenkins, Kubernetes, Terraform, and AWS (Broadway Infosys capstone).

- Virtual Cloth Try-On Using Neural Networks — deep learning system for virtual clothing preview (Python).
- Employee Recommendation System — content-based CV screening engine (Python, Django, PostgreSQL).

EDUCATION

Bachelor of Engineering, Computer Engineering | *Himalaya College of Engineering* 2018 – 2023

- Coursework and major project complete; final backlog clearance in progress.

+2 Science | *KIST College* 2016 – 2018
